PROFILE

- Full Stack Developer with a Master's degree in Design.
- Detailed knowledge and work experience of modern Javascript frameworks and technologies - React, React Native and associated libraries and tooling including GraphQL and serverless backend.
- Strong attention to detail, proactive, able to troubleshoot and work through complex problems independently and collaboratively.

WORK EXPERIENCE

Planes

Jul 2020 – Current, London, UK
Software Engineer (Contractor)

- Collaborate with product managers, designers and other engineers in an Agile working environment to deliver both new functionalities and iterative improvements to client's web and mobile applications.
- Build scalable, reusable and highly responsive applications using TypeScript, React Native, React Native Web, Next.js, GraphQL, Apollo, Lambda, AWS serverless stack, Knex, Postgres, Contentful, Dotdigital, Salesforce and Stripe.
- Participate in code reviews and knowledge-sharing with other engineers

Freelance

Jun 2020 – Current, London, UK
Web Developer/Designer

- Design and develop user-facing websites from concept to production.

M. de Nood

Oct 2019 – Mar 2020, London, UK
Studio Assistant Intern

- Work with the studio team for the Autumn / Winter 2020 collection from initial concept to production.
- Assist with pattern cutting and produce accurate toiles for development. Produce samples to couture standards, from preparing fabric for cutting to working on industrial machines and hand sewing for finishing.

XU ZHI

Sep 2018, Jan – Apr 2019, London, UK
Design Intern

- Support the creative team with researching, sourcing for fabrics and trims, developing textile samples, draping and making toiles for product development for London Fashion Weeks.
- Assist seamstresses with making showpiece and alteration to the deadlines given, including pattern cutting, hand sewing, and working on industrial machines.

Xuege

Jun – Aug 2017, Wenzhou, China
Design assistant

- Assist designers during the design process from researching to making pre-production samples, including creating mood boards, making embroidery and beading samples, CAD drawings, sourcing fabrics and trims and creating tech packs.
- Work closely with the accessory department, in-house pattern makers and the sample room throughout the sample-making.
